

JIMMA CITY ADMINISTRATION

User List & Access Matrix

Role definitions, permissions, demo accounts, and user register template

Purpose: Practical reference for implementation, operations, training, and handover of the Jimma City Digital Street Address MIS.

Document: MIS-GOV-004

Prepared: 27 August 2026

System: Jimma City Digital Street Address MIS

1. Role and user list

The following list describes the supported user accounts and the responsibilities attached to each role. Assign each person only the access needed for their work.

Role	Recommended user group	Scope	Key responsibilities
Administrator	System administrator / MIS lead	All city data and configuration	Manage users, maintain setup data, monitor audit logs, manage records, and support all workflows.
City Officer	City-level approval team	City-wide review and management visibility	Final approval/rejection, address generation, reports, user-management visibility, setup, and audit review.
Kebele Officer	Kebele verification team	Assigned kebele operational review	Verify or reject submitted properties, review evidence, and maintain review accountability.
Enumerator	Field collection team	Assigned data collection work	Register properties, capture GPS/photos, save offline drafts, submit, correct, and resubmit rejected records.
Viewer	Read-only stakeholders	Read-only application view	Review dashboards, properties, maps, reports, and permitted setup views without changing records.

2. Permission matrix

Function	Admin	City Officer	Kebele Officer	Enumerator	Viewer
Sign in and view dashboard	Yes	Yes	Yes	Yes	Yes
View/search properties	Full	Full	Operational	Own/assigned work	Read-only
Create property	Yes	Review role	Review role	Yes	No
Edit draft/rejected property	Yes	As authorized	As authorized	Yes	No
Submit for verification	Yes	As authorized	As authorized	Yes	No
Kebele verify	Yes	Yes	Yes	No	No
Final approve and generate address	Yes	Yes	No	No	No
Reject with remark	Yes	Yes	Yes	No	No
Map and reports	Yes	Yes	Yes	Yes	Yes
Maintain kebeles/streets/blocks	Yes	Yes	View/limited	No	View
Manage users	Yes		No	No	No

		Visible management view; creation policy should be governed by Administration			
Audit log review	Yes	Yes	Operational review	Operational review	No
Mobile/offline collection	As needed	No	No	Yes	No

3. Demo/test users

Demo-only: The credentials below are documented for controlled training and testing. Change or disable them before production use.

Username	Password	Role	Training purpose
admin	admin123	Administrator	Full system demonstration
city_officer1	admin123	City Officer	Final approval demonstration
kebele_officer1	admin123	Kebele Officer	Kebele verification demonstration
enumerator1	admin123	Enumerator	Online, mobile, and offline capture
viewer1	admin123	Viewer	Read-only demonstration

4. New-user provisioning checklist

1. Confirm the person, department, role, and kebele assignment where applicable.
2. Use a unique username and collect a verified work email and phone number where notifications are required.
3. Assign the least-privilege role; Kebele Officer and Enumerator accounts require a kebele assignment.
4. Give the user a temporary password and require a password reset or secure change at first operational use.
5. Test sign-in and one permitted action, then test one denied action.
6. Record the provisioning decision in the approved administrative register.

5. User register template

Full name	Department	Username	Role	Kebele	Phone/email verified	Active	Review date

Controlled reference document. Update this document when the approved workflow, roles, integrations, or deployment configuration changes.
